7ZIP **Market Replay CL 06-17 (NT8)** ⬇ **Download** ★★★★★

NT 8 Market Replay data for CL

Contract: CL 06-17

Download instructions:

dowload and unzip file in NT 8 replay folder
Documents\NinjaTrader 8\db\replay
The file will create a folder with the relevant front month and
a series of .nrd files inside (one per day)

Make sure to use the "extract here" function as shown, and not the "Extract to" function, to avoid the creation of a
folder within a folder.

Note: this is Market Replay data for NinjaTrader 8. The format is different from NT7.

Also note, these downloads are likely not to include Sundays data.

NT8 Hull Moving Average Color Change ⬇ **Download** ☆☆☆☆☆

Hello All,

Like many others, in migrating over to NT 8 many indicators are not available yet. I use the HMA often and prefer when color changes if rising or falling.

Here's my conversion using the script found on the NT Forums here: http://ninjatrader.com/support/forum/showthread.php?t=79551&page=7

Enjoy.

Thanks a lot for your work. Very nice.

Spread ⬇ **Download** ☆☆☆☆☆

Shows the difference between two instruments. Particularly useful for treasury spreads like FYT, FOB, NOB, etc. You must specify the front and back leg and the ratios. The CME lists current ratios here: http://www.cmegroup.com/trading/interest-rates/intercommodity-spread.html

Example: NOB spread
FrontRatio: 3
BackRatio: 1
FrontLeg: ZN 06-17
BackLeg: ZB 06-17

Note that it adds a separate data series for each leg of the spread so you don't need either leg to be the main chart data series (IE you could add NOB spread to an ES chart).

Thanks.

Horizontal Ray DrawingTool ⬇ **Download** ☆☆☆☆☆

This drawing tool is coded as a native NT DrawingTool class rather than within an indicator wrapper. There have been many requests over the years for NT to add a native horizontal ray tool but it has still yet to be implemented. This tool was created based on the original NT Lines.cs file.

I've yet to experience any issues, however, it is not advised that any trading actions be based on this add-on (i.e. alert to trigger a live market order if this horizontal ray is crossed). Hot-key activation is also supported through the standard NT selection dialog.

Exported using NT Version 8.0.12.0 64-bit (Standard)

Thanks so much!

February 14th, 2018 09:58 PM **mmaker** ⭐⭐⭐⭐⭐
I like this capability. Thanks for designing it.

How do I assign a hot key to it?

😊

More...

📄 **Round Numbers V2** ⬇ **Download** ⭐⭐⭐⭐

This code allows lines to be drawn at regular price levels. I had this converted professionally from a NT7 indicator so I <u>cannot</u> assist with support.
The lines are customisable with the usual line options as well as the line length.
I hope someone else finds it helpful.

not working for me.

May 12th, 2017 02:22 PM **moerfutures** ⭐⭐⭐⭐⭐
very helpful, esp with new alert and trade features with NT8 😊 DOUBLE 5 STAR !!

More...

📄 **'NoGaps' ChartStyle - eliminate intraday candle gaps** ⬇ **Download** ⭐⭐⭐⭐⭐

This chart style is identical to the standard NinjaTrader candlestick style except that it uses the previous candle's closing value for the current candle's open value (except when the current bar is the first bar of a session). This eliminates single tick gaps between intraday bars when the last price changes on the first tick of a new bar. As a result, charts appear smoother and are easier to read and interpret, without any price data truly being modified. See attached example of ES.

Exported using NT Version 8.0.6.1 64-bit (Standard)

Details: <u>'NoGaps' ChartStyle - eliminate intraday candle gaps</u>

Submitted by: <u>brohnhdon</u> [?]

edit: The file has been updated to display doji bodies in the same color as the wick (NT default behavior is to display dojis with the candle *outline* color, but this becomes a problem when you try to display candles with no outline.)

Awesome thanks

HIGH VOLUME ALERT **Download** ★★★★

A simple indicator that shows the high volume. You can change the volume alert depending the time frame used.
Converted from NT7. I found this indicator useful in this forum some years ago. I use it in time frames of one and five minutes.

October 4th, 2017 03:55 PM **snowpatrol** ★★★★
Nice indicator. A volume feature would make it really amazing. Still, love the vertical

bars highlighting the surge in volume.
